Mr Griffin:

The Board of Directors of the Big Canoe Property Association is concerned with the timing of the correspondence sent by Georgia Safe Dams on Thursday, May 20, 2021 to David Hopkins and the communications of a report from the February 2021 inspection.

With an Open Records Request, we understand the Recipient must receive any updated available report within three business days. However, it appears this awaited report was sent to Big Canoe's contact, Jason Brownell and Geosyntec's, Wes MacDonald, on behalf of Big Canoe's Property Owner Association, on the same day the report was sent to Hopkins.

The Board understands you and Wes MacDonald spoke several times on Friday, May 21 regarding the quarterly inspection reports and master plan Geosyntec had developed and furnished GSD earlier this year regarding our Lake Petit Dam.

I understand your schedule must be full as you assume responsibility for the Georgia Safe Dams program. The Board is entrusted to provide its best judgement in assessing information from all sources and relaying accordingly to our property owners. I would appreciate your time in the next few days to discuss.

Candace Robertson
President, Big Canoe Property Owners Association
