Post Office Box 2546
Augusta, GA 30903

SUBJECT: Lake Petit Dam
Pickens County

Dear Mr. Robertson:

In reviewing the stability analysis report by Geo Syntec, I noted they referenced design drawings by Baldwin and Cranston Associates, Inc. for "Petit Cove Dam". Additionally, Geo Syntec noted that there were two reports titled "Test Borings and Sub Surface Investigation" by Coleman Engineering Laboratories, Inc. dated December 1971 and January 1971. Do you have copies of this information? If so, please forward a copy of the plans and reports to our office.

Furthermore, do you have any construction inspection and testing reports available? What about construction specifications?

If there are any questions, please contact our office at 404/362-2678.

Sincerely,

Francis E. Fiegle II, P. E.
Program Manager
