TELEPHONE LOG

Date: 8/01/2008

Caller: Neil Davies

Phone Number: 678-202-9545

Representing: Big Canoe

Person Handling Call: A. W. Murray

Dam/Issue: Big Canoe

County: Pickens

Subject/Issue(s) Discussed:

1. He wanted to get an extension for the engineering investigation for the issues at this dam. The problem was the number of pipes in the plunge pool area that were undetermined and of unknown origin. They would like to investigate which are dam drains and which are road drains. They even plan to do TV camera investigations as needed.
2. I allowed them to have until 8/29/08 which was OK with Davies and Scott Fletcher.
3. They will locate and mark all appropriate drains and give us a map. Big Canoe is OK with this and has dug out the plunge pool area to assist the process. We have the plans for the wave-erosion and are at Tom Woosley's office.

Action Taken: Extend deadline to 8/29.

Written Follow-up (yes/no): No.
